Noida, India | +918755773777 | vatsal@vatsal.games | vatsal.games

Detail-oriented gameplay analyst with expertise in bug identification and gameplay systems. Proven track record in improving player engagement and competitive fairness through structured gameplay analysis.

EXPERIENCE

JUL 2024 -
PRESENT

GAMEPLAY ANALYSIS PROJECT AMITY UNIVERSITY, NOIDA

Conducted a structured gameplay analysis study examining glitches and exploits in Call of Duty Warzone and their impact on competitive integrity.

Key work included:

- Identification of gameplay-breaking exploits
- Analysis of player frustration vs gameplay balance
- Documentation of gameplay bugs and system inconsistencies
- Study of developer responses and community feedback
- Evaluation of long-term impact on player engagement

Tools used:

Gameplay observation • System analysis • Documentation
